

1.

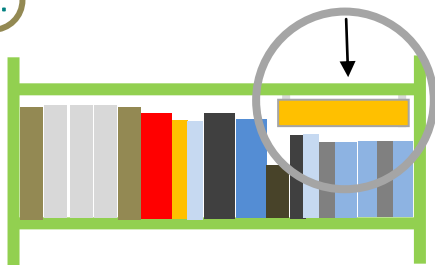

Unused space

2.

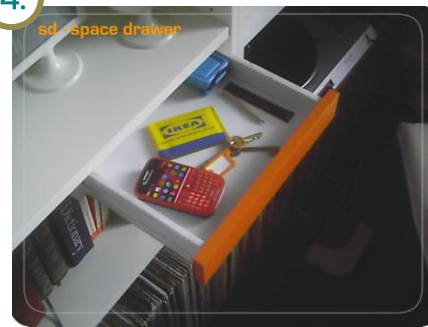

Rearrange large books to one side, smaller books to the other

3.

Space made to insert an SD

4.

In use

A storage unit/drawer for the popular IKEA BILLY bookcase (and LACK tables).

The SD utilizes commonly unused shelf space. Whether books, ornaments or pictures are on a shelf, it is likely there is unused space above.

The SD can be used for small, important items usually forgotten or misplaced around the house – keys, phone, receipts, travelcards, gadgets etc.

Memory tool: The SD establishes a familiar place where to store all-important items.

Intended for light use. Drawer pulls out totally (later model – travel limiter).

Looks the part and requires only basic D.I.Y skills to fit.
