sd-space drawer

You will need these tools.

1.

   A mechanical hand drill or electric/battery powered drill.

2. 
   Ideally use a WOOD drill bit.

   A 4mm (for BILLY) or

   A 2mm (for LACK) drill piece.

3.

   A Phillips No 2 screwdriver.

4. 
   A bradawl – This is used to pilot before drilling.

5. 
   A ruler, some tape and a pencil (or felt tip).

6. 
   A cheaper type of super-glue.

   This fitting stage is not essential but recommended (for LACK only).

7. 
   A rasp type file for leveling drilled holes after placing super-glue and trying screws (LACK fitting only).

   Pliers to unscrew LACK leg screws if they become left behind in the table.
