

Scroll down for more information and an instruction manual.

Purchasing a CD Locator '3' comes with both 'T' and 'Z' towers.

Test instructions for the CD Locator

1. Open up the CD Locator and go to the List sheet.
2. Select the first cell corner (bottom right) and drag the Artist/Band 1 cell down to a desired amount.

	Artist/Band	Track/Song/Album	Label
1	Artist/Band 1		
2			
3			
4			
5			
6			

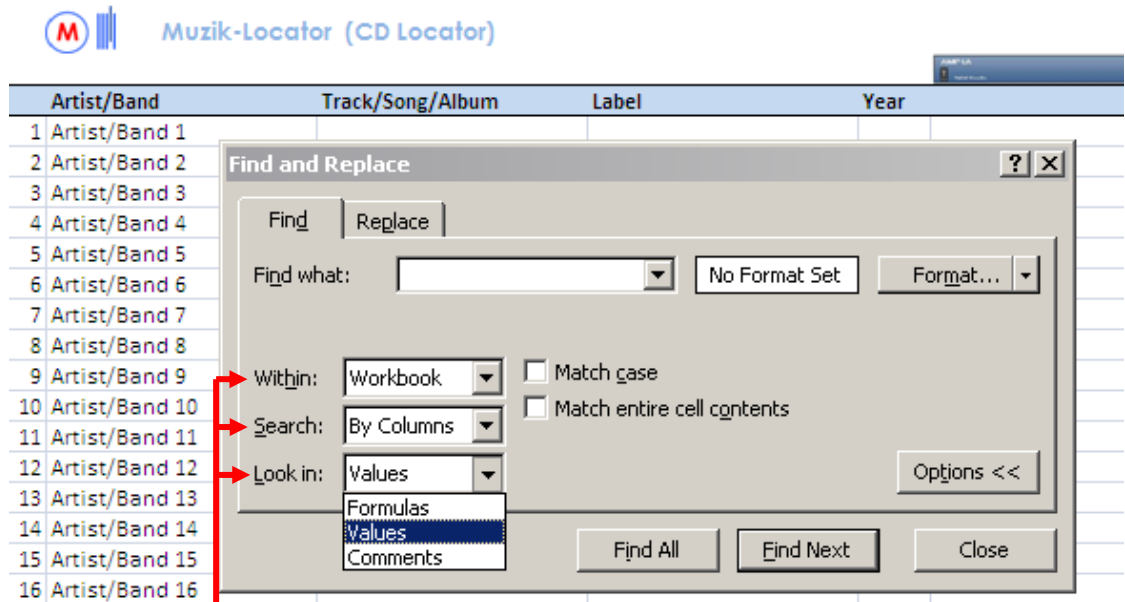

A diagram illustrating the first step of the test instructions. A red circle highlights the bottom-right corner of the first cell in the 'Artist/Band' column. A red arrow points to this corner. A large white arrow with a black outline points downwards from the corner, indicating the direction of the drag operation.

	Artist/Band	Track/Song/Album	Label
1	Artist/Band 1		
2	Artist/Band 2		
3	Artist/Band 3		
4	Artist/Band 4		
5	Artist/Band 5		
6	Artist/Band 6		
7	Artist/Band 7		
8	Artist/Band 8		
9	Artist/Band 9		
10	Artist/Band 10		
11	Artist/Band 11		

- Now press **Control + F** to show the 'Find and Replace' box.

- Select the 'Options' box.

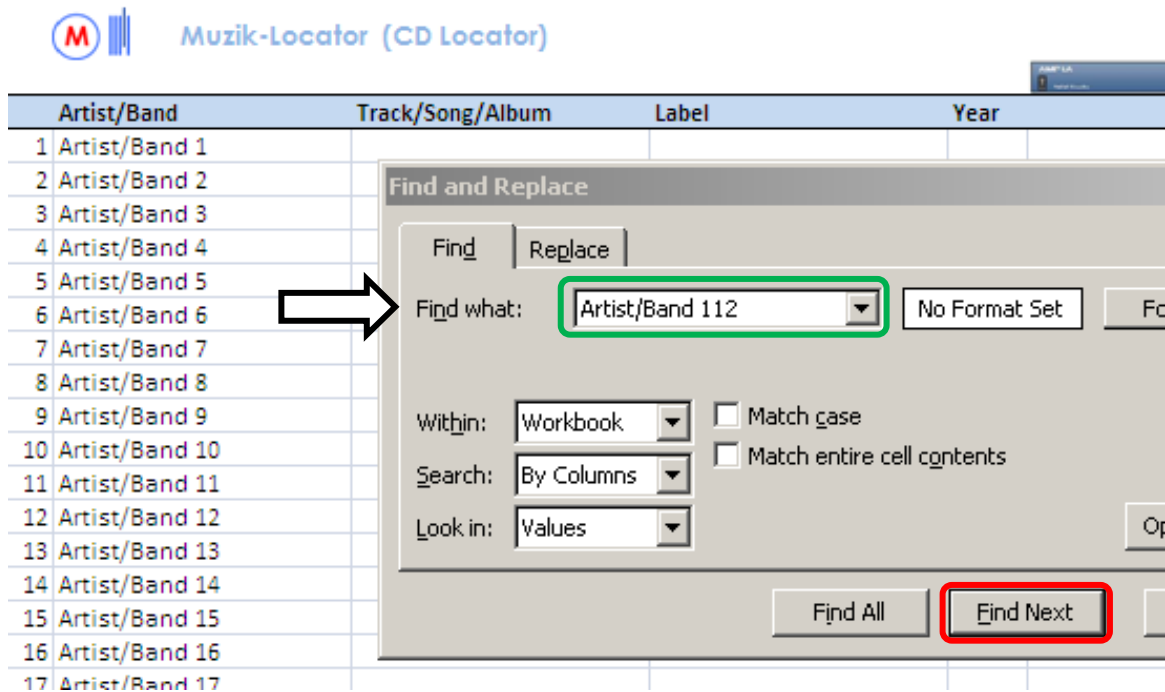

- Set search fields **OTHERWISE THE CD LOCATOR WILL HAVE A LIMITED FUNCTION.**

Set 'Within:' to 'Workbook' to search the whole workbook and not one sheet.

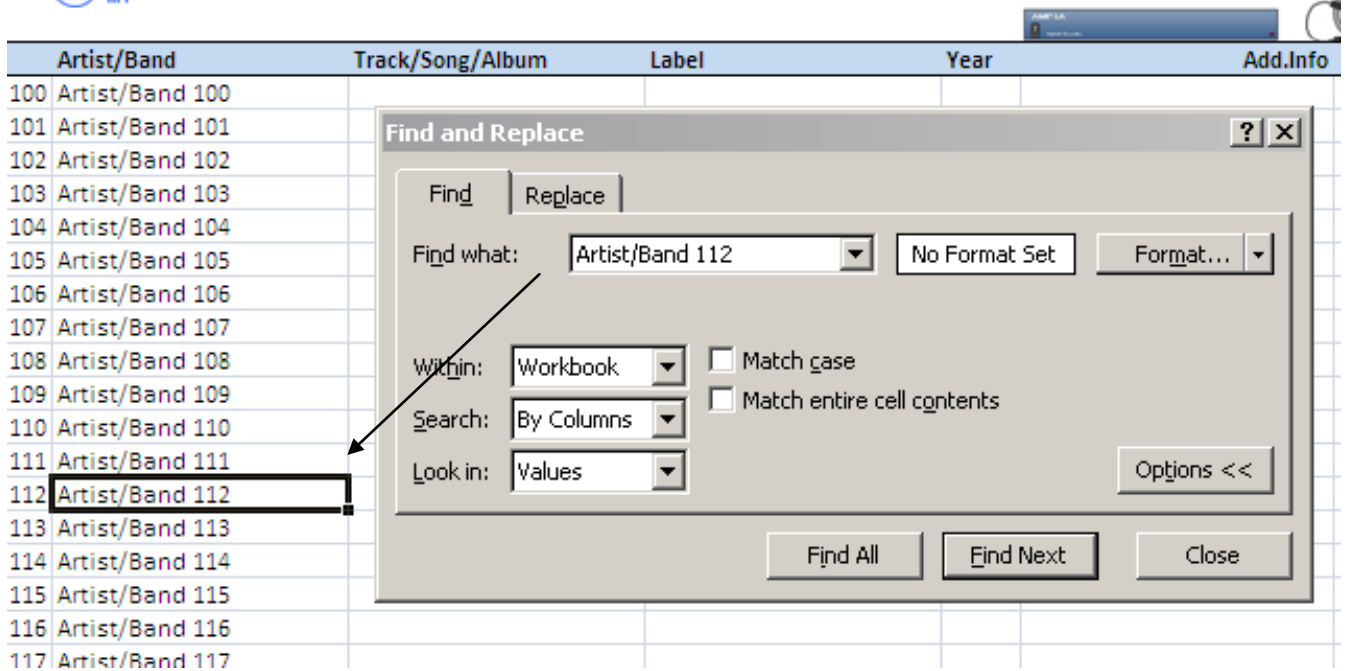

Set 'Search:' to 'By Columns'. Data such as record titles, labels, etc are listed in columns.

Set 'Look in:' to 'Values' to search by values assigned to a cell (what is entered).

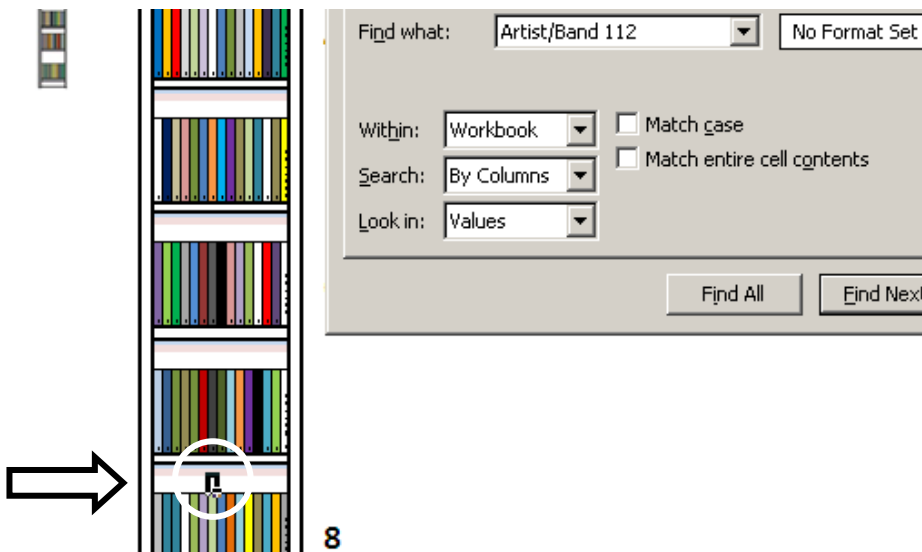

- Now type e.g. a desired Artist/Band number in the '**Find what:**' field (you can also type just a number). Make sure text contains no errors.

- Press **Return** or '**Find Next**'.

8. The selector finds the searched cell.
9. Press 'Return' again. The selector goes to the Locator sheet and appears either above, on, or below a CD. The selector acts as a pointer where to search for your 'real' CD.
10. Users can press 'Return' a number of times to cycle through the workbook.

All users have to do is catalogue their CDs in the list sheet. Ensure everything catalogued is in identical order with the real shelves.
